Descriptions & Operation

B.R.Precisions Power Hydraulic machine vice: Angle fixed type, suitable for horizontal and vertical combined heavy cutting for cnc Machining centre, VMC and HMC, Angle Fixed type spherical segment ball can produce the force for angle locking which can make the vice plate floating upward and avoid slanting of the workpiece. powerful material cast iron, with high absorption and has strong anti-tension, which can keep long durability for absorption and has strong rigidity with high precision tenon slot grounded. Made out of high tensile casting, machined & surface ground to ensure maximum accuracy. Jaw plates are made out of tool steel, hardened and ground inbuilt hydraulic Booster system for maximum clamping force with minimum pressure.
Note: No hammering, No-pipe locking.
